Play'n GO wraps up ICE 2026 in Barcelona with a result that goes beyond the numbers and highlights its strong industrial positioning. The software provider ends the week with two major awards and a special recognition for 20 years in the business, reaffirming its role as a key player in the international gaming landscape.

Specifically, Play'n GO was named RNG Casino Supplier and Sustainability Supplier, two awards that reflect the pillars on which the company has built its long-term strategy: technological reliability, product quality, and an approach to sustainability that is structural rather than merely declarative. These accolades are complemented by the Landmark Awards 2026 - 20 Years in the Business, celebrating two decades of continuous market presence — a significant achievement in a rapidly evolving industry.

Taken together, the awards outline a clear trajectory. On the one hand, Play'n GO's ability to deliver RNG solutions valued by operators and regulators alike for their stability, compliance, and performance. On the other, a sustainability strategy fully embedded in the operating model, which over the years has distinguished the company through consistent industrial choices, a strong focus on responsible gaming, and a long-term vision extending beyond individual product lifecycles.

ICE 2026 also provided an important opportunity for direct engagement with partners, operators, and international stakeholders. Barcelona, now firmly established as a hub for the global gaming industry, offered the setting for meetings and discussions that further reinforced Play'n GO's position as a reliable supplier and credible counterpart in regulated markets.
